Projects and Internships

- | | |
|---|-------------------------------------|
| Developed and hosted a real-time tech fest website | <i>October 2024 – November 2024</i> |
| <ul style="list-style-type: none">Developed a real-time website for Technical Fest of CSE department named “PIXEL 2024” in JNTUA College of Engineering from scratch individually with attractive UI and responsiveness. The website showcases the information about the tech fest. Individual users can register for events by paying money through integrated payment gateway. The website was managed for 10 days with real-time updates. | |
| Web Developer Intern at Innovate Intern | <i>May 2024 – July 2024</i> |
| <ul style="list-style-type: none">Developed front-end solutions using HTML, CSS, and JavaScript, and worked on QR code management system in a team. This project enhanced technical skills and deepened the understanding of web development best practices. | |
| Live Weather Forecast (Self Project) | <i>February 2024 - March 2024</i> |
| <ul style="list-style-type: none">Designed and developed a responsive live weather forecast website application using ReactJS that provides real-time weather data using APIs for a city with city name auto suggestions (Geo DB cities API and Open Weather API). The project aimed to enhance customer experience with a user-friendly interface using a robust tech stack. | |
